

ASPHALT PLANT OPERATOR

POSITION SUMMARY:

An asphalt plant operator is the person who is responsible for overseeing the daily operations within a plant that produces asphalt. This position is found in various asphalt factories and plants across the world. This position works within the plant itself, and the environment can involve physical labor in an indoor atmosphere. Formal education is not typically required within this job. However, the more experience the operator has, the better. Knowledge regarding plant operations, mechanical abilities, and various asphalt mixes is always preferred.

ESSENTIAL JOB FUNCTIONS:

- Operates concrete, asphalt, or sand and gravel plant to batch, crush, or segregate materials used in construction: Moves controls on panelboard or control board to heat, dry, and mix ingredients, such as asphalt, sand, stone, and naphtha, to produce asphalt paving materials; to weigh and mix aggregate, cement, and water to produce concrete; or to control feeding, crushing, and sifting machinery in sand and gravel plant.
- Observes gauges, dials, and operation of machinery to ensure conformance to processing specifications.
- May repair machinery, using hand tools, power tools, and welding equipment.
- May be designated according to type of plant operated as Asphalt-Plant Operator;

Concrete-Batch-Plant Operator; Sand-And-Gravel-Plant Operator; or according to machine function as Crusher Operator.

Responsibilities involved with an asphalt plant operator can include:
